

## Reviews of the McNaughton Center Saver

### **Reviews on the Kel McNaughton System.**

"A marvel of ingenuity ... from the standpoint of concept, design, construction and finish it's pretty remarkable and completely unique. Will make the toughest turning chore mere child's play, only safer."

### **The Canadian Woodturner, May 1995.**

---

"This revolutionary tool is the most exciting thing to come out of woodturning in a long time." Australian Home Handyman, Dec. 1995. "The Kel McNaughton System saves timber, time and money - one of the most significant advances in woodturning development."

### **Australian Woodworker, July 1995.**

---

"An excellent investment for any woodturner, professional or amateur."

### **American Woodturner, March 1995.**

---

" .... most valuable tool."

### **More Woodturning, June 1999.**

---

"The ease of use of this tool is brilliant."

### **N.Z. Faceplate, Sept. 1994.**

---

"Not only is it the safest, most cost effective and efficient tool I know of to nest out bowls, it's also a superb creative tool."

### **The Canadian Woodturner, July 1996.**

---

"One of those tools you wish had been on the market years ago. The first version worked like a dream. The new version is even better."

## **Woodturning, Dec. 1997.**

---

"Nested bowls more easily and safely than ever before."

## **American Woodworker, Oct. 1996.**

---

"The System is strong, safe and extremely versatile and has great potential for creative woodturning."

## **Australian Wood Review, March 1998.**

---

"The easiest we have found."

## **Understanding Woodturning by A. and B. Phillips.**

---

"Beyond Compare."

## **N.Z. Faceplate, 1998.**

---

"A tool that saves woodturners time, money, wastage and mess and at the same time is safe to use deserves the name 'Woodturning Tool of the Century'."

## **Woodturning, March 1996.**

---

"A Necessity."

## **American Woodturner, 1998.**

---

"The blades are good for hundreds of bowls. If you are doing lots of large bowls and platters this is the tool for you. The Kel McNaughton System is dead-easy to use once you get the knack."

## **N.Z. Faceplate, March 1999.**

---

"The pick of the specialist tools that has been invented over the years has to be the Kel McNaughton System for bowl centre saving. The ingenious jig and cutters make it more versatile and superior to all other devices that have been invented and used over the years."

## **Woodturning with Ray Key. 1998.**
